Who we are

About Privy

Our mission is to make privacy and user ownership the default online. We build simple, flexible developer tooling that make it easy to build products that put users first. By leveraging modern cryptography, we shift the status quo around digital ownership and protect the accounts and assets of millions of users.

Engineering at Privy is not just about writing world-class code. We create software that turns complex technical systems into delightful

developer tools. We assemble tried-and-true primitives into intuitive, responsive APIs and beautiful interfaces. We believe in open-source work and transparency with our teammates and users. We encourage each other to think big, run experiments and follow our curiosity so we can build better tooling that lets developers shine and empower their users.

What you'll do

As our first Developer Experience Engineer hire at Privy, you will bridge the gaps between our product and developer community. You will be responsible for improving developer experience, reducing support burden through proactive education, and building developer advocacy initiatives to drive adoption and engagement of our product. Customer obsession is a core part of Privy's culture. You'll work closely with fellow engineers, product, and business teams to ensure Privy's customers needs are met.

Responsibilities

- Create and maintain code samples, starter repos, and recipes that help developers integrate our product effectively

- Establish and create a regular cadence of developer-focused content (blog posts, video tutorials, code samples)

- Collaborate with internal teams to organize our documentation, prioritize content gaps and improvements, and gather developer feedback on all content effectiveness.

- Engage with the developer community through industry events, hackathons, and other channels.

Who you are

Minimum requirements

6+ years of experience in a developer advocacy, technical evangelism, technical writing or similar role.

Adept programming skills and a deep understanding of the technologies the company uses.

Excellent written and verbal communication skills, with the ability to explain complex concepts in a clear and concise manner.

Passion for building and engaging with developer communities.

Strong problem solving skills, identify and solve technical challenges.

Ability to build relationships, collaborate with others, and work effectively in a team environment.

Preferred qualifications

Strong preference for experience in an API-based business and in payments, fintech, or crypto.

Hybrid work at Stripe

Office-assigned Stripes spend at least 50% of the time in a given month in their local office or with users. This hits a balance between bringing people together for in-person collaboration and learning from each other, while supporting flexibility about how to do this in a way that makes sense for individuals and their teams.

Pay and benefits

The annual US base salary range for this role is \$175,200 - \$262,800. For sales roles, the range provided is the role's On Target Earnings ("OTE") range, meaning that the range includes both the sales commissions/sales bonuses target and annual base salary for the role. This salary range may be inclusive of several career levels at Stripe and will be narrowed during the interview process based on a number of factors, including the candidate's experience, qualifications, and location. Applicants interested in this role and who are not located in the US may request the annual salary range for their location during the interview process.

Additional benefits for this role may include: equity, company bonus or sales commissions/bonuses; 401(k) plan; medical, dental, and vision benefits; and wellness stipends.

We look forward to hearing from you

At Stripe, we're looking for people with passion, grit, and integrity. You're encouraged to apply even if your experience doesn't precisely match the job description. Your skills and passion will stand out—and set you apart—especially if your career has taken some extraordinary twists and turns. At Stripe, we welcome diverse perspectives and people who think rigorously and aren't afraid to challenge assumptions. Join us.
